

# QUALITY POLICY

Wolox is a company created in 2012 with the purpose of promoting industries through technological innovation driven by high-impact professional teams.

Our commitment to quality, strong customer orientation and a people-centered work culture are our driving forces towards becoming a leading brand in the industry. By implementing continuous improvement plans, we are getting increasingly closer to our goal.

We want to make Wolox a creative ideas generator and a technological benchmark. We seek to be a renowned innovation center and to be directly associated with: state-of-the-art technology, high quality products, development of technological solutions, and creation of start-ups.

By focusing on processes, we ensure increased client satisfaction through the effective implementation of the quality management system, including processes for continuous system improvement and ensuring compliance with client requirements and applicable laws and regulations.

We protect the occupational health, personal safety and quality of life of our employees and of all those who participate in our Projects, performing injury prevention, analysis and control of operational risks.

We stimulate and facilitate the human, technical and professional development of our collaborators.

We are committed to entrepreneurship, to starting up companies over and over again, because it is what motivates us, what leads us to a total focus and dedication to our work, and it is the flame that ignites the enthusiasm and commitment we put into our day-to-day work.

We believe that the best result comes from being comfortable in our working environment and doing what we like. We seek to work in a relaxed environment, but at the same time with a methodical and responsible approach. For this, we carefully choose our team and strengthen it every day.

Additionally, the trust earned with our clients and our team is based on transparency and always keeping our word. By working ethically and professionally, we strengthen the relationship with our internal and external clients.

We have created a group of engineers, designers and professionals of excellence, always working in harmony with Wolox's distinctive culture to achieve all the company's objectives.
